

# Ohio | Department of Rehabilitation & Correction

John R. Kasich, Governor  
Gary C. Mohr, Director

January 13, 2016

Dear Partners in Reentry,

I am excited to bring some recent changes within the Department of Rehabilitation and Correction (DRC) to your attention. We have reorganized sections in an effort to align programming, reentry, research and evidence based practices endeavors. Staff currently independent of one another will be reorganized under a new section entitled the Office of Programming, Development and Evaluation.

I am the newly appointed Deputy Director over this section. Over the years, I have had an opportunity to work with many of you in my former positions within the Division of Parole and Community Services or prison operations. I am looking forward to reconnecting with many and also making new acquaintances in my new capacity.

Norman Robinson has accepted the position as Warden at the Franklin Medical Center. We would like to thank Norm for his many contributions to Reentry efforts throughout the state. Mike Davis, most recently Religious Services Administrator for the Department, will lead the Office of Reentry Planning and Enterprise Development. His section will consist of the current staff of the Office of Offender Reentry, Office of Enterprise Development and Evidence Based Practice oversight.

You will find our Reentry efforts to be uninterrupted and we anticipate the realignment will better serve our internal and external customers. Both Mike and I welcome any suggestions or input you may have. Feel free to contact us with the enclosed phone numbers or email addresses.

Sincerely,

Jessica Dennis, Deputy Director  
Office of Programming, Development and Evaluation
