MULTIMEDIA MARKETING

Our Beginnings

Established in 1992, PNN began as a localized video production program operated at Marion Correctional Institution (MCI). PNN provided daily television programs including movies, in-house productions and medical department training videos.

During the past 20 years PNN has expanded into graphic arts, animation, web site design and full-service video production.

In 2009, renovation was completed on PNN's state-of-the-art graphics and video studio. The 1,800 sq. ft. studio provides PNN with the space required to service its clients in a professional and secure environment.

What makes PNN Unique?

PNN's high-skilled work force is comprised of offenders. Each offender is trained in a multitude of areas, including customer service, project management and cost sustainability.

PNN's client base has also expanded. All federal, state, and local agencies qualify for PNN's services.

In addition, all non-profit faith-based and community organizations can benefit from the cost savings that PNN provides.

Welcome to PNN, a place where creativity originates, inspiration comes alive and ideas become reality. Since day one, the mission and focus of PNN has been to provide opportunities for offenders to learn new skills and to offer cost effect savings to its clients. This vision has remained unchanged. At PNN you'll experience professionalism, networking, and end to end solutions. No matter what your professional media needs, PNN has a format that will deliver unsurpassed quality and reliability.

PNN Video Services

Think you have to spend a bundle on video production services? Think again. PNN multimedia solutions provides more services than you expect, for less money than you imagined. It's our mission. There are post production facilities - and there are post production facilities with 20 years of experience.

Our offender staff provide a full line of post services, from editing to duplication. You've got enough stress without seeing your critical project footage undermined by glitches. We protect your precious asset so that the capabilities of your vision can go as far as your creativity will take you.

The ability to produce commercial quality pre & post video services has been the anchor of PNN's history. PNN utilizes commercial quality production methods to produce service announcements, promotional and training videos. PNN has over 20 years of experience and has produced thousands of hours of pre & post video production projects for federal, state, and local government agencies and non-profit organizations.

If you want to go beyond the quality of your media budget, PNN is your one-stop shop for pre & post production video services.

Sound Editing

What makes great video? Simply put - great audio!

PNN realizes that you can have sold shooting principles and incredible editing skills, but if the audio is bad so is the video.

PNN audio editing can remove an instrument that's in the way of an otherwise perfectly good track, making each track a better fit for your specific needs.

We can move a beat or create music to align with an event in your video. Or we can duck music for dialog without having to lower the volume of the entire track.

Audio is an extremely vital part of the final video product. While some sound-editing processes overlap, each is unique. PNN has the software and experience that suit your specific needs to give you the quality product your project demands.

Discover the Possibilities with Animation

Making great animation isn't easy, it needs outstanding skills, creativity, appropriate software - and a passion for moving images.

Animation and visual effects are all around us. PNN has performed brilliantly in a demanding commercial environment where a rapid turnaround of material and look is required. PNN has the ability to create 3D Animation, Visual Effects, Classical Animation or Digital Character Animation. PNN offers a variety of content, and affordable animation applications that will make your presentation dynamic.

PNN offers graphic arts that focus on the type of clients and projects that mean something to us. It's creatively inspiring to work alongside clients who are doing such amazing things around the State of Ohio, and it's created a niche that allows us to offer services to the types of clients who want to work with us.

The best thing though, is that our clients share our beliefs and realize the value that design can have to bring positive change.

Promoting our sustainable design solutions does a great deal for our business. it not only attracts like-minded clients, it also makes our work more rewarding.

Those passionate about reintegration and sustainability tend to have optimistic, collaborative visions and projects.

When it comes to graphic design, efficiency is key. While this may mean a focus on concept and production method used for print projects, it can also speak to strengthen an agency or organization and improve their project cost.

Website Design/Applications

Your website expresses your professional reputation and selecting the right website designer is important and so is the cost. PNN takes website development seriously, we offer the ideal combination of secure and affordable custom designed sites to meet lead-edge marketing solutions.
